Product Description

Takeuchi TW95 Wheel Loader

Powerful and efficient, the Takeuchi TW95 delivers exceptional performance, comfort, and serviceability. It is an ideal loader for a wide range of applications including load and carry, snow removal, and feedlots. The cabin is spacious and features a deluxe high-back air ride seat with heat and armrest, single lever joystick control for all loader functions and directional changes (F-N-R), a proportional thumb wheel for auxiliary hydraulic functions, and rocker switches to control a wide range of machine functions. A standard hydraulic quick coupler makes changing attachments quick and efficient.

The TW95 is powered by a 114 hp, Deutz TCD 3.6 L4 engine that is Final Tier 4 using an SCR and DOC exhaust after treatment system. The hydrostatic drive is responsive and delivers excellent power for loading applications, and it also provides dynamic braking, slowing the loader as the operator backs off the throttle. High-speed road gear is standard equipment and enables the loader to travel at speeds up to 24.8 mph for greater mobility and versatility. 100% locking differentials can be engaged at low speeds to provide maximum tractive effort in the most demanding conditions. Maintenance and inspections are simple to perform on the TW95 due to the wide opening engine hood that provides access to key daily inspection points.
