Product Description

Morbark Eger Beaver 812 Brush Chipper

The Eger Beaver 812 Brush Chipper is the only chipper in its class to feature both a wide infeed chute and a large diameter chipping disc. The combination offers operators ease of material feeding with less trim and saw labor required to process material and greater chipping efficiency to power through material to complete jobs faster. Featuring a direct drive chipping disc, simply start the machine, throttle to full RPM, and engage the feed control bar. Additionally, the folding infeed tray quickly stows away, locking into position to provide ease of transport. Perfect for rental yards, landscapers, golf courses, orchards, pruning crews, and more, the Eger Beaver 812 chipper is easy to use, transport, operate, and maintain.
