Product Description

Kress 60V Brushless Axial Blower - Bare tool - KG561.9

KRESS lithium-ion battery-powered blowers have set the new benchmark in handheld blower airflow. Extreme power makes your most difficult clean-up jobs a breeze. Without fuel mixing, starter cords, and chokes, your blower is ready when you are. Enjoy professional-level performance without the complexity of a typical gas-powered blower.

- Variable Air Control nozzle; Switch between wide-area blowing at an air volume of 850 CFM and an extremely powerful spot-cleaning jet at a speed of 175 MPH
 - Kress-built brushless motors deliver greater levels of power, runtime, and an extended service life
 - The unique air nozzle creates more air volume without using more charge from the battery to blow the leaves and debris away
 - Continuous variable speed control with Turbo mode maximizes the efficiency, runtime, and power
 - Well-balanced and ergonomic design for optimized controls and reduced fatigue
 - Part of the Kress 60V Battery System, one 60V battery can power all Kress 60V tools
-
