Product Description

Blue Diamond Attachments - 60" Low Profile-Tooth General Purpose Bucket

The Blue Diamond® General Purpose Buckets for skid steers are available in a variety of configurations. We offer weld-on cutting edge, bolt-on cutting edge, teeth, toothbar, or a long-bottom version. These well-engineered, low-profile buckets offer a powerful breakout force and great visibility. Buckets up to 72" wide use 3/16" material back and bottom. The 78" and larger sizes use 1/4" material. All standard buckets are 20" tall and use a 3/4" by 6" cutting edge. The standard bottom is 30" front to back, and the long-bottom bucket is 36".

**Not recommended for track machines*

- Low profile: 20" high, 29" deep
