Product Description

Bluebird Turf LS34H Log Splitter 34-Ton, Honda

Conquer any log-splitting tasks with Bluebird's Gen II industrial-grade LS34H log Splitter. Its 34 ton capacity will handle the largest logs, while its large diameter push rod and 17.5GPM pump provide fast cycle times typically only seen in smaller capacity units. The Gen II beam is 4x stronger, and the Gen II cutting wedge is 41% heavier with 6 additional clamping bolts, adding strength and rigidity and prolonging the overall life. This machine can be operated in either the horizontal or vertical position.
