Product Description

Snowdog Bulldog 2×1 - Electric Power Meets Outdoor Versatility

The **Snowdog Bulldog 2×1** is a large, 2-seater electric motorcycle developed by **Snowdog LLC**, an American company. Combining the agility of a motorcycle with the rugged practicality of an ATV, the Bulldog 2×1 is powered by a **single 4 kW BLDC electric motor** with a built-in charger and a range of **up to 40 miles** per charge.

An optional **on-board 2 kW generator** charges the battery on the move, extending total runtime up to **4 hours in combined mode**. The Bulldog 2×1 also supports an **additional battery installation** to double your power reserve — making it a smart, scalable choice for any outdoor professional.

Why Choose the Snowdog Bulldog 2×1?

- **2-seater electric design** - combines motorcycle handling with ATV-level ruggedness
- **4 kW BLDC single motor** - efficient, reliable rear-wheel drive for trails, fields, and backcountry terrain
- **Range up to 40 miles** on a single charge — expandable with an optional second battery to double the reserve
- **Optional 2 kW on-board generator** - charge while riding for up to 4 hours of combined range (adds \$500)
- **Built-in charger with 2.5-hour charge time** - minimal downtime, maximum productivity
- **Ultra-low maintenance** - no oil changes, no oil filters, no costly service operations
- **Top speed up to 41 mph** - capable performance across a wide range of outdoor environments
- **Tubeless 8 × 12 × 25 in tires** - puncture-resistant and trail-ready
- **Rifle & gear holder, handguards, USB port, cigarette lighter socket** - fully outfitted for hunters, farmers, and outdoor enthusiasts
- **Advanced 3-mode lighting system** - 40W low beam, 40W high beam, and 20W red light

Optional Generator Upgrade

Order the Bulldog 2×1 with an on-board 2 kW generator for continuous battery charging while in motion. This extends your operational range to **up to 4 hours in combined mode** — available for an additional **\$500** at the time of order.

Expandable Battery System

The Bulldog 2×1 is engineered to accept an **additional battery pack**, doubling your power reserve with a simple upgrade. Whether you're covering large properties, running long trail routes, or working remote land, the expandable battery system ensures you always have the range you need.
