Product Description

Snowdog Bulldog 2×2 - Where Motorcycle Meets ATV, Fully Electric

The **Snowdog Bulldog 2×2** is a large, 2-seater electric all-wheel-drive motorcycle developed by **Snowdog LLC**, an American company. Combining the agility of a motorcycle with the rugged capability of an ATV, the Bulldog 2×2 is a category of its own. Powered by **two electric hub motors delivering 7 kW total** (3 kW front / 4 kW rear), it offers instant torque, silent operation, and a range of **up to 40 miles** on a single battery charge.

An optional **on-board 2 kW generator** charges the battery on the move, extending total runtime up to **4 hours in combined mode**. And with support for an **additional battery installation**, you can double your power reserve — going further with zero compromise.

Why Choose the Snowdog Bulldog 2×2?

- **2-seater electric AWD design** - the best of a motorcycle and ATV in one capable machine
- **Dual hub motors (7 kW total)** - 3 kW front + 4 kW rear for confident all-wheel traction on any terrain
- **Range up to 40 miles** on a single battery — with optional second battery to double the range
- **Optional 2 kW on-board generator** - charge while riding for up to 4 hours of combined range (adds \$500)
- **Built-in charger with 2.5-hour charge time** - fast turnaround, always ready to ride
- **Ultra-low maintenance** - no oil changes, no oil filters, no costly service intervals
- **Top speed up to 41 mph** - capable and responsive on trails, fields, and backcountry routes
- **Tubeless 8 × 12 × 25 in tires** - puncture-resistant performance for off-road confidence
- **Rifle & gear holder, handguards, USB port, cigarette lighter socket** - fully equipped for hunters, farmers, and outdoor professionals
- **Advanced lighting system** - 40W low beam, 40W high beam, and 20W red light for all conditions

Optional Generator Upgrade

You can order the Bulldog 2×2 with an on-board generator for extended range riding. The generator adds continuous charging capability while in motion, extending runtime up to **4 hours in combined mode**. This option is available for an additional **\$500** at the time of order.

Expandable Battery System

The Bulldog 2×2 is designed to accept an **additional battery pack**, effectively doubling your power reserve. This makes it an ideal choice for longer expeditions, remote property work, or any situation where maximum range is critical.
