### Product Description

#### Snowdog X - The Future of Winter Traction Is Electric

Make the switch to electric! We are proud to introduce the **Snowdog X** — a new generation of Snowdog, 10 years in the making. Since 2019, our engineering team has been developing this unique electric towing machine of our own design. The result is a groundbreaking electric Snowdog equipped with an **on-board generator that charges the battery while you ride** — eliminating range anxiety and keeping you moving up to **3 hours in combined mode**.

Whether you're an angler, hunter, farmer, or winter outdoor enthusiast, the Snowdog X delivers silent, powerful, and emission-friendly performance in the harshest winter conditions.

#### Why Choose the Snowdog X Electric Snow Tractor?

- **On-board 2.8 kW generator** - charges the battery on the move, extending range up to 3 hours in combined mode
- **4 kW electric motor (9 kW peak power)** - instant torque of 170 N·m for powerful, responsive traction
- **3 riding modes** - Economy, Sport, and Reverse for full control in any situation
- **Maximum speed of 28 mph** - fast, efficient travel across winter terrain
- **Li-ion battery with 1,500 charge cycles** - built for years of reliable winter seasons
- **Quick charging in just 2.5 hours** (with 25A charger) - minimal downtime between uses
- **Heated grips & handguards** - operator comfort and protection in extreme cold
- **Zero emissions during electric-only operation** - environmentally responsible winter mobility
- **Perfect for anglers, hunters, farmers** and all winter outdoor professionals

#### How the On-Board Generator Works

The Snowdog X features a built-in generator that continuously charges the Li-ion battery while the machine is in motion. This innovative system combines the clean benefits of electric drive with the extended range of a hybrid power approach — giving you **up to 3 hours of runtime** without stopping to recharge. On battery alone, range reaches up to 1 hour\*, making the Snowdog X versatile for both short and long winter outings.

#### Snowdog X - Technical Specifications

- **Electric Motor:** 4 kW
- **Maximum Power:** 9 kW
- **Torque:** 170 N·m

- **Generator Power:** 2.8 kW
- **Maximum Speed:** 28 mph
- **Speed Modes:** Economy / Sport / Reverse
- **Li-ion Battery Capacity:** 58 A·h
- **Range (battery only):** up to 1 hour \*
- **Range (with generator):** up to 3 hours
- **Battery Charge Cycles:** 1,500
- **Charging Time (25A charger):** 2.5 hours
- **Dimensions (L × W × H):** 58.6 × 23.6 × 31.5 in
- **Weight:** 350.5 lb
- **Heated Grips:** Yes
- **Handguards:** Yes

\* Range on battery only may vary depending on terrain, load, temperature, and riding mode.
