Product Description

Honda HSM1336i Two-Stage Snow Blower - Professional Snow Clearing Power

The **Honda HSM1336i** represents the pinnacle of Honda's snow blower engineering, delivering exceptional performance and reliability for homeowners and professionals who demand the best. This 36-inch two-stage snow blower combines Honda's legendary engine technology with advanced features designed to make snow removal faster, easier, and more efficient than ever before.

Unmatched Honda Reliability and Performance

At the heart of the HSM1336i is a powerful **Honda 337cc iGX engine**, renowned worldwide for its reliability, fuel efficiency, and easy starting even in the coldest conditions. Honda engines are engineered to deliver consistent power throughout the toughest winter storms, ensuring you can clear your driveway, sidewalks, and pathways quickly and effectively.

This two-stage snow blower features a *36 inches* clearing width, allowing you to tackle large areas in fewer passes. The robust auger system breaks through packed snow and ice while the high-speed impeller throws snow up to **49 feet away** (model dependent), keeping cleared areas completely snow-free.

Superior Drive System for Maximum Control

The Honda HSM1336i is equipped with a **Track Drive** system that provides exceptional traction and maneuverability in all snow conditions:

- **Track Drive Technology:** Aggressive rubber tracks provide superior grip on icy surfaces, slopes, and uneven terrain
- **Enhanced Traction:** Tracks distribute weight evenly, preventing the snow blower from getting stuck in deep snow
- **Precise Control:** Navigate tight spaces and corners with confidence, even in challenging conditions
- **All-Terrain Performance:** Handles gravel driveways, slopes, and rough surfaces better than wheeled

models

Convenient Starting System

The HSM1336i features **Electric Start (Battery)**, making cold-weather starting effortless. With Honda's advanced electric start system, you simply turn the key and go - *no extension cord required*. The onboard battery provides reliable starting power, while the backup recoil starter ensures you're never stranded. This dual-starting capability gives you complete confidence that your Honda snow blower will start when you need it most.

Advanced Features for Easier Snow Removal

Every aspect of the Honda {model} has been engineered for maximum user convenience and efficiency:

- **Hydrostatic Drive Transmission:** Single-lever speed control allows infinite adjustment from 0 to full speed
- **Electric Joystick Chute Control:** Adjust throwing distance and direction without leaving the operator position
- **Auger Height Control:** Variable auger heights let you clear down to the pavement or adjust for gravel surfaces
- **Serrated Steel Augers:** Heavy-duty augers break through ice and compacted snow with ease
- **Auger Protection System:** Shear bolt design protects drivetrain components from damage
- **High-Power LED Headlight:** Bright illumination for early morning or evening snow clearing
- **Fingertip Steering Controls:** Easy directional control even with the engine off
- **Large Fuel Tank:** Extended run time means fewer refueling stops during big storms

Built to Last - Honda Quality Construction

Honda snow blowers are built with premium materials and meticulous attention to detail. The *steel-reinforced auger housing* withstands years of heavy use, while the **articulated chute** provides smooth, reliable operation. Reversible skid shoes protect the auger housing and can be flipped when worn, extending the life of your investment.

The {model} includes a **pneumatic gas strut** for effortless height adjustment and a convenient chute-clearing tool stored right on the machine for safe snow removal from the discharge chute.

Warranty and Support

Your Honda {model} snow blower is backed by a **3-year residential warranty**, reflecting Honda's confidence in their engineering and construction quality. With Honda's extensive dealer network, you'll have access to expert service, genuine Honda parts, and knowledgeable support throughout your ownership experience.

Hybrid Power Technology

The revolutionary HSM1336i combines Honda's proven gas engine with an electric motor for enhanced performance. The **hybrid drive system** provides instant power delivery and smoother operation, while maintaining the extended run time and power of a gas engine. This innovative technology represents the future of snow removal equipment.
