Product Description

McCormick X1.25H Compact Utility Tractor 24 HP

The McCormick X1.25H is a 24 HP 3-cylinder compact utility tractor from the COMPACT X1 series. The McCormick COMPACT X1 series is built for homeowners, hobby farmers, and anyone needing a dependable compact tractor for everyday work around the property. With rugged steel and cast iron construction, standard four-wheel drive, and a choice of transmissions, the X1 lineup handles loader work, grading, tilling, snow removal, and landscaping with confidence.

The McCormick X1.25H in Detail

At 24 engine horsepower, the X1.25H delivers the right balance of power and maneuverability for the tasks it was designed to handle. The 3-cylinder engine produces strong torque from low rpm, maintaining consistent forward progress even when implement loads vary across changing ground conditions. The Hydrostatic transmission provides smooth, predictable power delivery and reduces operator fatigue during repetitive operations. Four-wheel drive engages reliably when traction is needed and disengages smoothly on less demanding terrain.

The hydraulic system on the X1.25H is sized to match the demands of the implements that a 24 HP tractor will typically operate. Flow rates are sufficient for responsive control of mounted and semi-mounted implements, and the load-sensing design ensures that hydraulic power is directed where it is needed without unnecessary energy consumption. The three-point hitch provides ample lift capacity for rear-mounted implements, and the independent PTO allows implement drive to continue independently of the transmission during headland turns.

Features

- FPT three or four-cylinder engine with Tier 4 Final emissions compliance
- Standard mechanical four-wheel drive for confident traction in all conditions
- Hydrostatic or synchro shuttle transmission depending on model
- Category I/II three-point hitch compatible with a wide range of implements
- Rear PTO for driven implements including mowers, tillers, and generators
- Loader-ready design with integrated provisions for front loader attachment
- Compact footprint for maneuvering in tight spaces around buildings and trees
- Rugged steel and cast iron construction for long service life

Performance and Reliability

McCormick has engineered the COMPACT X1 series with a focus on long-term reliability and low cost of ownership. The X1.25H benefits from extended service intervals, straightforward maintenance access, and a robust parts and dealer network. All service points are accessible without specialist tools, and the engine compartment provides clear access to oils, coolant, and filter elements that require regular attention. The drivetrain is built to the same standards used across the McCormick range, using proven components that have demonstrated durability across a wide range of operating conditions worldwide.

The operator environment in the X1.25H is designed around the reality of a full working day in the field. Controls are positioned to minimize reach and fatigue, and the instrument layout provides clear information about key machine parameters without distraction. Whether operating from an enclosed cab with full climate control or an open platform, the operator has everything needed to work productively and safely across a long shift.

Applications

- Homestead and hobby farm general-purpose tractor work
- Property maintenance including mowing, grading, and snow removal
- Front loader work for material handling around buildings and yards
- Small-scale cultivation, tilling, and landscaping
- Connecting a wide range of compact implements via the three-point hitch

The McCormick X1.25H at 24 HP is a well-specified, dependable machine for anyone who needs genuine agricultural performance without over-engineering or unnecessary complexity. Contact your local McCormick dealer to arrange a demonstration and discuss how the X1.25H fits your operation.
