Product Description

McCormick X4.070 Utility Tractor 68 HP

The McCormick X4.070 is a 68 HP 4-cylinder utility tractor from the RS58 X4 series. The McCormick RS58 X4 series is designed with simplicity, efficiency, and versatility in mind. Available in both cab and ROPS configurations, the X4 is built around a proven FPT four-cylinder engine and a transmission lineup that makes direction changes effortless and daily farm work more productive.

The McCormick X4.070 in Detail

At 68 engine horsepower, the X4.070 delivers the right balance of power and maneuverability for the tasks it was designed to handle. The 4-cylinder engine produces strong torque from low rpm, maintaining consistent forward progress even when implement loads vary across changing ground conditions. The Synchro Shuttle transmission provides smooth, predictable power delivery and reduces operator fatigue during repetitive operations. Four-wheel drive engages reliably when traction is needed and disengages smoothly on less demanding terrain.

The hydraulic system on the X4.070 is sized to match the demands of the implements that a 68 HP tractor will typically operate. Flow rates are sufficient for responsive control of mounted and semi-mounted implements, and the load-sensing design ensures that hydraulic power is directed where it is needed without unnecessary energy consumption. The three-point hitch provides ample lift capacity for rear-mounted implements, and the independent PTO allows implement drive to continue independently of the transmission during headland turns.

Features

- FPT four-cylinder 2.5L engine, Stage V compliant
- Synchro shuttle or electro-hydraulic shuttle transmission for smooth direction reversals
- Mechanical four-wheel drive with front axle rated for loader use
- High-capacity hydraulic system with multiple remote spool valve options
- Independent rear PTO with 540 and 540E economy rpm modes
- Category II three-point hitch with electronic draft control
- Available in fully enclosed cab or open ROPS platform
- Loader-ready with factory-integrated valve provisions

Performance and Reliability

McCormick has engineered the RS58 X4 series with a focus on long-term reliability and low cost of ownership. The X4.070 benefits from extended service intervals, straightforward maintenance access, and a robust parts and dealer network. All service points are accessible without specialist tools, and the engine compartment provides clear access to oils, coolant, and filter elements that require regular attention. The drivetrain is built to the same standards used across the McCormick range, using proven components that have demonstrated durability across a wide range of operating conditions worldwide.

The operator environment in the X4.070 is designed around the reality of a full working day in the field. Controls are positioned to minimize reach and fatigue, and the instrument layout provides clear information about key machine parameters without distraction. Whether operating from an enclosed cab with full climate control or an open platform, the operator has everything needed to work productively and safely across a long shift.

Applications

- Mixed farming requiring a reliable, versatile utility tractor
- Livestock farms for loader work, bale handling, and yard maintenance
- Arable operations including tillage, fertilizer spreading, and seeding
- Hay and forage production from mowing through to baling
- Commercial horticulture and market gardens

The McCormick X4.070 at 68 HP is a well-specified, dependable machine for anyone who needs genuine agricultural performance without over-engineering or unnecessary complexity. Contact your local McCormick dealer to arrange a demonstration and discuss how the X4.070 fits your operation.
