SKU: MCCORMICK-X4.090F-CAB

Categories: [McCormick](#)

### Product Description

## McCormick X4.090F CAB Specialty Tractor 90 HP

The McCormick X4.090F CAB is a 90 HP 4-cylinder specialty tractor from the RP5D X4F CAB series. The McCormick RP5D X4F CAB is a specialty tractor that sets a high standard for performance in row-crop environments. The fully enclosed cab, narrow bonnet profile, and electro-hydraulic shuttle transmission make it a productive and comfortable machine for operations where precision and all-day operator comfort are essential.

### The McCormick X4.090F CAB in Detail

At 90 engine horsepower, the X4.090F CAB delivers the right balance of power and maneuverability for the tasks it was designed to handle. The 4-cylinder engine produces strong torque from low rpm, maintaining consistent forward progress even when implement loads vary across changing ground conditions. The Electro-Hydraulic Shuttle transmission provides smooth, predictable power delivery and reduces operator fatigue during repetitive operations. Four-wheel drive engages reliably when traction is needed and disengages smoothly on less demanding terrain.

The hydraulic system on the X4.090F CAB is sized to match the demands of the implements that a 90 HP tractor will typically operate. Flow rates are sufficient for responsive control of mounted and semi-mounted implements, and the load-sensing design ensures that hydraulic power is directed where it is needed without unnecessary energy consumption. The three-point hitch provides ample lift capacity for rear-mounted implements, and the independent PTO allows implement drive to continue independently of the transmission during headland turns.

### Features

- Deutz TCD 2.9L four-cylinder engine, Stage V compliant
- Fully enclosed cab with climate control and ergonomic control layout
- Electro-hydraulic shuttle for smooth, fatigue-free directional changes
- Narrow bonnet profile for precise maneuvering in row-crop environments
- High-flow open-center hydraulic system delivering up to 29 GPM
- Rear PTO at 540 and 1000 rpm with independent engagement
- Category II three-point hitch with electronic draft control
- Panoramic cab windows for all-round visibility during close-quarters work

## **Performance and Reliability**

McCormick has engineered the RP5D X4F CAB series with a focus on long-term reliability and low cost of ownership. The X4.090F CAB benefits from extended service intervals, straightforward maintenance access, and a robust parts and dealer network. All service points are accessible without specialist tools, and the engine compartment provides clear access to oils, coolant, and filter elements that require regular attention. The drivetrain is built to the same standards used across the McCormick range, using proven components that have demonstrated durability across a wide range of operating conditions worldwide.

The operator environment in the X4.090F CAB is designed around the reality of a full working day in the field. Controls are positioned to minimize reach and fatigue, and the instrument layout provides clear information about key machine parameters without distraction. Whether operating from an enclosed cab with full climate control or an open platform, the operator has everything needed to work productively and safely across a long shift.

## **Applications**

- Row-crop farming where precision and reduced crop damage are priorities
- Specialty crop operations requiring a narrow-profile enclosed cab tractor
- Farms combining row-crop work with general field cultivation duties
- Agricultural contracting in intensive horticulture environments
- Operations where all-day enclosed cab comfort is a key requirement

The McCormick X4.090F CAB at 90 HP is a well-specified, dependable machine for anyone who needs genuine agricultural performance without over-engineering or unnecessary complexity. Contact your local McCormick dealer to arrange a demonstration and discuss how the X4.090F CAB fits your operation.
