### Product Description

## McCormick X6.440 XtraShift Utility Tractor 130 HP

The McCormick X6.440 XtraShift is a 130 HP 4-cylinder utility tractor from the RS2C X6 series. The McCormick RS2C X6 series is built around the principle of all-round reliability. A four-cylinder FPT engine, high-capacity hydraulic system, and flexible transmission options give the X6 the capability to handle virtually every task on a mixed or arable farm with consistent competence throughout the year.

### The McCormick X6.440 XtraShift in Detail

At 130 engine horsepower, the X6.440 XtraShift delivers the right balance of power and maneuverability for the tasks it was designed to handle. The 4-cylinder engine produces strong torque from low rpm, maintaining consistent forward progress even when implement loads vary across changing ground conditions. The XtraShift Powershift transmission provides smooth, predictable power delivery and reduces operator fatigue during repetitive operations. Four-wheel drive engages reliably when traction is needed and disengages smoothly on less demanding terrain.

The hydraulic system on the X6.440 XtraShift is sized to match the demands of the implements that a 130 HP tractor will typically operate. Flow rates are sufficient for responsive control of mounted and semi-mounted implements, and the load-sensing design ensures that hydraulic power is directed where it is needed without unnecessary energy consumption. The three-point hitch provides ample lift capacity for rear-mounted implements, and the independent PTO allows implement drive to continue independently of the transmission during headland turns.

### Features

- FPT four-cylinder 4.5L engine, Stage V compliant
- XtraShift powershift or electro-hydraulic shuttle transmission options
- Automatic front-wheel drive engagement for optimal traction
- Load-sensing hydraulic system with multiple remote spool valve options
- Independent PTO at 540, 540E economy, and 1000 rpm
- Electronic draft and position control for precision depth management
- Spacious, low-noise cab with ergonomic control layout and climate control
- Power Plus function provides additional horsepower for PTO and transport work

## **Performance and Reliability**

McCormick has engineered the RS2C X6 series with a focus on long-term reliability and low cost of ownership. The X6.440 XtraShift benefits from extended service intervals, straightforward maintenance access, and a robust parts and dealer network. All service points are accessible without specialist tools, and the engine compartment provides clear access to oils, coolant, and filter elements that require regular attention. The drivetrain is built to the same standards used across the McCormick range, using proven components that have demonstrated durability across a wide range of operating conditions worldwide.

The operator environment in the X6.440 XtraShift is designed around the reality of a full working day in the field. Controls are positioned to minimize reach and fatigue, and the instrument layout provides clear information about key machine parameters without distraction. Whether operating from an enclosed cab with full climate control or an open platform, the operator has everything needed to work productively and safely across a long shift.

## **Applications**

- Mixed farms where one tractor must handle many different tasks year-round
- Arable operations with diverse tillage, seeding, and transport requirements
- Livestock farms combining front loader work with hay and silage production
- Agricultural contracting requiring reliable performance across a full season
- Family farms where all-round capability in a single machine is the priority

The McCormick X6.440 XtraShift at 130 HP is a well-specified, dependable machine for anyone who needs genuine agricultural performance without over-engineering or unnecessary complexity. Contact your local McCormick dealer to arrange a demonstration and discuss how the X6.440 XtraShift fits your operation.
