Product Description

Bearcat CH611DH 6-inch Chipper

POWER AND EFFICIENCY COME STANDARD.

Crary® Bear Cat® engineers and manufactures the strongest lineup of towable Chippers right here in the USA. With a wide range of models, there is sure to be one that fits your needs. On top of this is a best-in-class warranty.

Invest in the Chipper that's loaded with new standard features to make your job easier. This Chipper can handle branches up to 6 inches in diameter, with the ability to chip the toughest brush with ease.

The 26 x 1 inch thick, 165-pound dynamically-balanced disc with cantilever design reduces wrapping while utilizing 4-reversible chipper blades, and an adjustable 4-sided anvil.

Features include a 6.7-inch rectangular discharge chute and a live hydraulic feed system with a variable speed feed roller with instant reverse. Our Auto-feed feed system automatically retries feeding limbs. The feed sensor is factory installed and standard equipment on the CH611DH. The feed roller is 15 inches in diameter for enhanced powerful feeding. The discharge chute extends to the end of the hitch for efficient loading and quickly rotates 360 degrees with ease. The CH611DH has a 6.5 x 13-inch feed throat opening with a wide-open feed chute mouth measuring 36 x 35 inches.

The triple-banded belt drive provides a better transfer of power. The Crary® Bear Cat® CH611DH also features a telescopic tongue with 2-inch ball coupler, torsion axle suspension, adjustable jack stand with wheel, and adjustable rear stabilizer.

2" coupler standard.

CE compliant model is available.

Battery sold separately.
